

We shared a list of resources earlier in the content. Here is an additional list you can take a look at as well.

Africa Software Engineering Publications and Newsletters:

1. *ITWeb*: ITWeb is a well-known technology publication in Africa that covers various topics, including software engineering, IT trends, industry insights, and software development methodologies.
2. *iAfrikan*: iAfrikan is a technology-focused platform that features news, articles, and insights on software engineering, startups, and technology innovations in Africa.
3. *TechCentral*: TechCentral is a leading technology news website in South Africa, covering a wide range of topics including software, programming, IT trends, and industry insights.

Global Software and Programming Publications and Newsletters:

1. *MIT Technology Review*: MIT Technology Review is a prestigious technology publication that covers software, programming, AI, and other cutting-edge technologies on a global scale.
2. *Developer Tech News*: Developer Tech News is an online publication that provides news, articles, and insights on software development, programming languages, and mobile app development.
3. *ACM Queue*: ACM Queue is a publication by the Association for Computing Machinery (ACM), covering various aspects of software engineering, distributed systems, cloud computing, and more.

Software Engineering YouTube Channels:

1. *Traversy Media*: Traversy Media is a popular YouTube channel offering tutorials and practical guides on software development, web development, and various programming languages.
2. *The Net Ninja*: The Net Ninja provides comprehensive video tutorials on web development, front-end and back-end technologies, and software engineering concepts.
3. *Programming with Mosh*: Programming with Mosh is a well-known channel that offers in-depth programming tutorials on various software engineering topics, including programming languages, design patterns, and data structures.

4. *freeCodeCamp*: freeCodeCamp is one of the largest programming communities on YouTube, offering free coding tutorials, challenges, and projects for learners of all levels.
5. *TheNewBoston*: TheNewBoston is a popular programming channel with a vast library of video tutorials covering various programming languages and software development topics.
6. *Sentdex*: Sentdex is a well-known channel that focuses on data science, machine learning, and Python programming, providing educational content and practical examples.
